

Managing Priority Habitats for Invertebrates 2nd Edition

This key reference work has been updated and three new volumes added. This is the only combined source of detailed information on the habitat requirements of 21 invertebrate groups on 32 UK Priority Habitats.

***Now with Ants Bees and Wasps, Mixed Beetles
and Calypterate Flies volumes!!***

'Invertebrates are more sensitive to poor habitat management than any other plants or animals. Getting management right for invertebrates will help to ensure that management is right for all biodiversity and this report from Buglife should help to achieve that.' – Nick Baker – TV presenter and natural historian.

Copies of the 32 habitat volumes are available on CD Rom priced **£24.99**. Included on this CD Rom are the 32 volumes arranged by habitat and 21 volumes rearranged by 'taxa' – over 1000 pages of detailed information written by leading experts.
