

# Worm in the Garden Drawing

Make your very own worm garden - with finger worms! Think about where earthworms like to eat and what they need in their surroundings to live.

## What you will need:

- A4 White Cardboard
- Colouring crayons
- Hole punch
- Scissors

## How to make your worm garden

Use the hole punch to make a few holes in the cardboard. Ask a grown up to help widen the holes so you can stick your finger through (your fingers will be the worms in the picture).

Draw around the holes to make a home for the earthworm. Think about what the worm would need to eat and make a home. You might even want to draw a bird or hedgehog for the worm to hide from.
